

HabEAT

"Improving your health one habit at a time"

HabEAT is an app that challenges individuals to adopt healthy eating habits through a supportive community.

FitComm

FitComm is a location-based social discovery service that facilitates communication between obese/overweight individuals and aspiring personal trainers to build a supportive and nurturing community that encourages health and fitness with an emphasis on love and mindfulness.

Stepping Stones

Tackling youth unemployment by equipping young local individuals with the skills and experience to step confidently into the world of work. Giving local businesses the opportunity to support the future of their local community.

Skills on Point

A London based recruitment agency run by graduates to equip unemployed youths with the skills to meet the needs of the capital's businesses.

FoodCycle

A fun and innovative way to tackle the consequential problems of sedentary urban living, namely obesity, by promoting health and wellbeing using pedal-powered bikes to blend healthy smoothies and soups, the sales of which finance educational workshops at local schools.

Re_Think BUSINESS

Re-Cycle – Recycling of public buses into versatile spaces for young entrepreneurs from disadvantaged backgrounds in Bogota.
Re_Think – Nourishing transferable skills in business and employability while providing a platform for social enterprise.
Re_Form – Exchanging poverty for development.

Water Fresh

We aim to provide the people of Harare with clean filtered water with the objective of reducing death from waterborne diseases.

Re-leaf

Responding to local water insecurity through alternative landscaping solutions and sustainable water management.

Aquaroot

Solving 'the largest mass-poisoning in history**' by bio-filtering arsenic contaminated groundwater to produce life-saving drinking water and ethical arsenic.

*(WHO, 2012)

Water Works

Water Works is a sustainable water treatment and distribution service for marginalised communities. We aim to create a community-driven, de-centralised network that improves the health of our customers whilst developing local markets.

The Green Wheel

A commuter hub for secure bikes and cleaner air in London.

E-newables

Energy saving e-commerce website; investing in social development and reducing carbon dependence by providing user-centred access to renewable technologies.

Lo-cool

Lo-cool is a sustainable food transport and carbon-neutral distribution fleet that provides fresh food to consumers with lower environmental impact. We aim to inspire local farmers' collaboration and environmental consciousness with food-mile tracking and carbon-emission mapping technologies.

Magnus Opus

Aspirational older individuals can join a dynamic entrepreneurial environment – Magnus Opus provides access to a first class incubator hub, mentoring, and business training - transforming society in the heart of London.

Grand Carers

'Spending their golden years, making your years more golden' GrandCarers is a platform of exchange that gives the older generation a sense of purpose. We do this by utilising their skills as experienced parents while providing affordable childcare to younger families.
